<b>Preface</b>	<b>v</b>
<b>1 Basic results on convexity</b>	<b>1</b>
1.1 Different types of convexity . . . . .	1
1.2 Convexity of a mollification . . . . .	4
<b>2 The weighted energy inequalities for convex functions</b>	<b>7</b>
2.1 The weighted square integral inequalities for the first derivative of the function of a real variable . . . . .	7
2.1.1 The weighted square integral estimates for the difference of derivatives of two convex functions . . . . .	10
2.2 Weighted integral inequality for the second derivative of 4-convex function . . . . .	20
2.2.1 The case of smooth 4-convex functions and mollification of an arbitrary 4-convex function . . . . .	20
2.2.2 The case of an arbitrary 4-convex function . . . . .	22
2.3 The weighted energy estimates for the third derivative of 6-convex function . . . . .	23
2.3.1 The case of smooth 6-convex functions and mollification of an arbitrary 6-convex function . . . . .	23
2.3.2 The case of an arbitrary 6-convex function . . . . .	27
2.4 The weighted energy estimates for the (2,2)-convex function . . . . .	30
<b>3 The weighted energy estimates for the vector valued functions</b>	<b>33</b>
3.1 The weighted reverse Poincaré-type estimate for the difference of two convex vector functions . . . . .	33
3.1.1 The reverse Poincaré inequalities for smooth vectors and approximation of arbitrary convex vectors by smooth ones . . . . .	34
3.1.2 Existence of weak derivative and reverse Poincaré type inequality for arbitrary convex vectors . . . . .	38
3.2 Weighted energy estimates for second derivative of 4-convex vector . . . . .	42
3.2.1 The case of an arbitrary 4-convex vector . . . . .	44

<b>4</b>	<b>The weighted energy inequalities for subsolution of 2nd order partial differential equations</b>	<b>47</b>
4.1	Reverse Poincaré-type inequalities for the difference of superharmonic functions . . . . .	47
4.1.1	The case of smooth superharmonic functions and mollification of weak superharmonic functions . . . . .	48
4.1.2	Existence of Sobolev gradient . . . . .	51
4.2	Reverse Poincaré-type Inequalities for the difference of superharmonic functions . . . . .	56
4.3	The energy estimates for smooth subsolution and approximation of weak subsolution . . . . .	57
4.4	The case of weak subsolution of wave equation . . . . .	62
4.5	The weighted energy estimates for the difference of weak subsolutions of wave equation . . . . .	65
4.5.1	Approximation of weak subsolution . . . . .	66
4.5.2	Reverse Poincaré type estimate for weak subsolution of wave equation . . . . .	67
4.6	The weighted energy estimates for the difference of weak subsolutions of telegraph equation . . . . .	73
4.7	The weighted reverse Poincaré type inequalities for elliptic subsolution . . . . .	80
4.7.1	Subsolutions that are close in the uniform norm are close in the Sobolev norm as well . . . . .	81
4.7.2	Preliminary material and the formulation of the basic result . . . . .	83
4.7.3	Auxiliary propositions and the proof of the basic result . . . . .	85
4.8	The weighted reverse Poincaré inequality for bounded smooth domains . . . . .	92
4.8.1	The energy inequality for the smooth L-subolutions . . . . .	94
4.8.2	The existence and integrability of first order weak partial derivatives for continuous weak L-subolutions and the weighted reverse Poincaré inequality . . . . .	98
4.9	The weighted reverse Poincaré type inequality for parabolic subsolutions . . . . .	102
4.9.1	Mollification of the weak parabolic subsolutions . . . . .	102
4.9.2	The case of smooth parabolic subsolutions . . . . .	105
4.9.3	The existence and the integrability of the Sobolev gradient . . . . .	108
<b>5</b>	<b>The weighted energy inequalities for subsolution of higher order partial differential equations</b>	<b>113</b>
5.1	The weighted square integral inequalities for smooth and weak subsolution of fourth order Laplace equation . . . . .	113
5.1.1	The weighted energy estimates for the smooth subsolution for the fourth order Laplace equation . . . . .	115
5.1.2	The weighted energy estimates for the weak subsolution using smooth ones for the fourth order Laplace equation . . . . .	121

5.2	The weighted energy estimate for the smooth subsolution of $n$ -dimensional <i>beam equation</i> . . . . .	126
5.3	The weighted energy estimates for the smooth and weak sub-solutions of fourth order partial differential equations . . . . .	146
5.3.1	The weight energy inequality for smooth sub-solution and approximation of weak sub-solution . . . . .	147
5.3.2	Existence of second order weak derivative and energy inequality for weak sub-solution . . . . .	152
5.3.3	Existence and integrability of weak partial derivatives and weighted square inequalities for the difference of weak subsolutions . . . . .	154
5.4	The weighted square integral inequalities for smooth and weak subsolution of system of partial differential inequalities . . . . .	158
5.4.1	The reverse Poincaré inequalities for smooth subsolution and approximation of weak subsolution by smooth ones . . . . .	159
5.4.2	The existence and integrability of weak partial derivative and weighted square inequalities for the difference of weak subsolutions . . . . .	162
