<b>What inspired us to write this book</b>	<b>vii</b>
<b>Preface</b>	<b>ix</b>
<b>Notation</b>	<b>xiii</b>
<b>1 Preliminaries</b>	<b>1</b>
1.1 Hilbert space and operators . . . . .	1
1.2 Self-adjoint operators . . . . .	6
1.3 Spectral decomposition theorem . . . . .	10
1.4 Notes . . . . .	14
<b>2 Kantorovich Inequality and Mond-Pečarić Method</b>	<b>15</b>
2.1 History . . . . .	15
2.2 Generalizations and improvements . . . . .	26
2.3 The Mond-Pečarić method . . . . .	33
2.4 Notes . . . . .	43
<b>3 Order Preserving Operator Inequality</b>	<b>45</b>
3.1 From the Löwner-Heinz inequality to the Furuta inequality . . . . .	45
3.2 The Ando-Hiai inequality . . . . .	50
3.3 The grand Furuta inequality . . . . .	53
3.4 The chaotic ordering . . . . .	59
3.5 The chaotically geometric mean . . . . .	64
3.6 Generalized the Bebiano-Lemos-Providência inequalities . . . . .	67
3.7 Riccati's equation . . . . .	72
3.8 Hua's inequality . . . . .	79
3.9 The Heinz inequality . . . . .	83
3.10 Notes . . . . .	88
<b>4 Kantorovich-Furuta Type Inequalities</b>	<b>91</b>
4.1 Introduction . . . . .	91
4.2 Difference version . . . . .	95
4.3 Version with the Specht ratio . . . . .	99

4.4	The Furuta inequality version . . . . .	107
4.5	Notes . . . . .	112
<b>5</b>	<b>Operator Norm</b>	<b>113</b>
5.1	Operator norm and spectral radius . . . . .	113
5.2	The Araki-Cordes inequality . . . . .	122
5.3	Norm inequality for the geometric mean . . . . .	127
5.4	Norm inequality for the chaotically geometric mean . . . . .	132
5.5	Complement of the Ando-Hiai inequality . . . . .	140
5.6	Converses of Hölder's inequality . . . . .	145
5.7	Notes . . . . .	148
<b>6</b>	<b>Geometric Mean</b>	<b>149</b>
6.1	Introduction . . . . .	149
6.2	Weighted geometric mean . . . . .	155
6.3	The Kantorovich type inequality . . . . .	163
6.4	The Specht type inequality . . . . .	165
6.5	The Golden-Thompson-Segal inequality . . . . .	166
6.6	Notes . . . . .	169
<b>7</b>	<b>Differential Geometry of Operators</b>	<b>171</b>
7.1	Introduction . . . . .	171
7.2	Interpolational paths . . . . .	172
7.3	Velocity vector of extended paths . . . . .	178
7.4	$\alpha$ -operator divergence . . . . .	181
7.5	Notes . . . . .	183
<b>8</b>	<b>Mercer's Type Inequality</b>	<b>185</b>
8.1	Classical version . . . . .	185
8.2	Operator version . . . . .	188
8.3	Operator version with mappings . . . . .	194
8.4	Chaotic order version . . . . .	203
8.5	Refinements . . . . .	209
8.6	Notes . . . . .	215
<b>9</b>	<b>Jensen's Operator Inequality</b>	<b>217</b>
9.1	Continuous fields of operators . . . . .	217
9.2	Non-unital fields of positive linear mappings . . . . .	224
9.3	Ratio type inequalities with power functions . . . . .	230
9.4	Difference type inequalities with power functions . . . . .	236
9.5	Quasi-arithmetic means . . . . .	244
9.6	Some better bounds . . . . .	255
9.7	Appendix . . . . .	266
9.8	Notes . . . . .	269

<b>10 Jensen's Operator Inequality Without Operator Convexity</b>	<b>271</b>
10.1 Jensen's inequality with a general convex function . . . . .	271
10.2 Order among power means . . . . .	278
10.3 Extension of Jensen's inequality . . . . .	284
10.4 Extension of order among quasi-arithmetic means . . . . .	289
10.5 Refinements . . . . .	293
10.6 Notes . . . . .	298
<b>11 Bohr's Inequality</b>	<b>299</b>
11.1 Bohr's inequalities for operators . . . . .	299
11.2 Matrix approach to Bohr's inequalities . . . . .	301
11.3 Generalized parallelogram law for operators . . . . .	303
11.4 The Dunkl-Williams inequality . . . . .	304
11.5 From Jensen's inequality to Bohr's inequality . . . . .	309
11.6 Notes . . . . .	311
<b>Bibliography</b>	<b>313</b>
<b>Index</b>	<b>331</b>
