Preface	v
1 Introduction	1
1.1 Convex Functions	1
1.2 Exponential and n -Exponential Convexity	5
1.3 Superquadratic Functions	6
1.4 Time Scales Theory	8
1.5 Jensen's and Related Inequalities	15
1.6 Hardy's Inequality	19
2 Jensen Type Inequalities for Convex and Superquadratic Functions	21
2.1 Positive Linear Functionals and Time Scales Integrals	21
2.2 Jensen's Inequality	24
2.3 Hermite–Hadamard Inequality	27
2.3.1 Applications	32
2.4 Inequalities Related to Jensen's Inequality	43
2.5 Further Converses of the Jensen Inequality	53
2.6 Jensen Type Inequalities for Superquadratic Functions	56
3 Jensen's Functionals, their Properties and Applications	63
3.1 Properties of Jensen's Functionals	63
3.2 Applications to Weighted Generalized Means	67
3.3 Applications to Weighted Generalized Power Means	69
3.4 Improvements of Hölder's Inequality	73
4 Jensen's Functionals for Several Variables, their Properties and Applications	79
4.1 Jensen's Inequality and Jensen's Functionals	79
4.2 Properties of Jensen's Functionals	81
4.3 Applications to Weighted Generalized Means	83
4.4 Applications to Additive and Multiplicative Type Inequalities	87
4.5 Applications to Hölder's Inequality	96

5	Improvements of the Jensen–Steffensen Inequality and its Converse	101
5.1	α -SP and α -HH Weights	101
5.2	Jensen–Steffensen Inequality	103
5.3	Converse of Jensen–Steffensen Inequality	111
5.4	Exponential Convexity and Logarithmic Convexity	115
5.5	Examples	117
6	Improvements of the Hermite–Hadamard Inequality	121
6.1	Converses of Jensen’s Inequality	121
6.2	Improvements of the Hermite–Hadamard Inequality	126
6.3	Mean Value Theorems	129
6.4	Exponential Convexity and Logarithmic Convexity	131
7	Hermite–Hadamard and Jensen–Mercer Inequalities on Time Scales for Several Variables	135
7.1	Preliminaries	135
7.2	Generalizations of the Hermite–Hadamard Inequality	137
7.3	Jensen–Mercer Inequality	145
7.4	Generalizations of Jensen–Mercer Inequality	149
7.5	Exponential Convexity	157
8	Cauchy Type Means and Exponential and Logarithmic Convexity for Superquadratic Functions	163
8.1	Mean Value Theorems	163
8.2	Generalized Means	167
8.3	Exponential Convexity and Logarithmic Convexity	175
9	Hölder and Minkowski Type Inequalities and Functionals	185
9.1	Integral Minkowski Inequality and Functionals	185
9.2	Converse Integral Minkowski Inequality and Functionals	192
9.3	Beckenbach–Dresher Inequality and Functionals	196
9.4	Refinement of the Integral Minkowski Inequality	199
9.5	Refinements of the Converse Hölder and Minkowski Inequalities	202
9.6	Refinements of Bellman’s inequality	205
9.7	Integral Inequalities of Popoviciu Type	207
9.8	Integral Inequalities of Diaz–Metcalf Type	211
10	Some Dynamic Hardy-Type Inequalities with General Kernels	213
10.1	Hardy Type Inequalities via Convexity in One Variable	213
10.1.1	Inequalities with General Kernels	214
10.1.2	Inequalities with Special Kernels	217
10.1.3	Examples and Special Cases	218
10.2	Hardy-Type Inequalities via Convexity in Several Variables	223

10.2.1	Inequalities with General Kernels	224
10.2.2	Inequalities with Special Kernels	225
10.2.3	Some Particular Cases	228
10.3	Hardy-Type Inequalities via Superquadratic Functions	235
10.3.1	Inequalities with General Kernel	236
10.3.2	Inequalities with Special Kernels	239
10.3.3	Some Particular Cases	241
10.4	n -Exponential Convexity of some Dynamic Hardy-Type Functionals	244
10.4.1	Applications to Cauchy Means	246
10.4.2	Applications to Isolated Time Scales	250
10.5	Refinements of Hardy-Type Inequalities on Time Scales	253
10.5.1	Results using General Kernels	253
10.5.2	Results using Special Kernels	260
10.5.3	Examples	265
