Preface	v
<b>1 Basic notation and fundamental results</b>	<b>1</b>
1.1 Jensen's inequality and its variants . . . . .	1
1.1.1 $n$ -exponentially and exponentially convex functions . . . . .	9
1.2 Some classical inequalities . . . . .	11
1.3 $C^*$ -algebras. Operators on a Hilbert space . . . . .	15
1.4 Operator monotone and operator convex functions . . . . .	18
1.5 Connections and solidarities. Operator means . . . . .	19
1.6 On some properties of the discrete Jensen's functional. Superadditivity . . . . .	22
<b>2 On Jessen's and McShane's functionals</b>	<b>27</b>
2.1 Properties of Jessen's functional and applications . . . . .	27
2.1.1 Jessen's functional . . . . .	28
2.1.2 Superadditivity of Jessen's functional . . . . .	29
2.1.3 Application to weight generalized means . . . . .	32
2.1.4 Application to Hölder's inequality . . . . .	37
2.1.5 Properties of the functionals related to the Minkowski inequality . . . . .	42
2.2 Properties of McShane's functional and applications . . . . .	48
2.2.1 McShane's functional . . . . .	48
2.2.2 Superadditivity of McShane's functional . . . . .	49
2.2.3 Application to weight generalized means . . . . .	52
2.2.4 Application to the additive and multiplicative-type inequalities . . . . .	55
2.2.5 Application to Hölder's inequality . . . . .	62
2.3 Related results on Hilbert's inequality . . . . .	64
2.3.1 On more accurate Hilbert-type inequalities in finite measure spaces . . . . .	64
2.3.2 Related results on multidimensional Hilbert's inequality . . . . .	74

<b>3 Jensen-type functionals under the Steffensen's conditions. Petrović-type functionals</b>	<b>99</b>
3.1 Superadditivity of Jensen-Steffensen's functional . . . . .	100
3.1.1 On discrete Jensen-Steffensen's functional . . . . .	100
3.1.2 Integral variants of Jensen-Steffensen's functional . . . . .	104
3.1.3 Application to quasiarithmetic means . . . . .	108
3.2 Superadditivity of Jensen-Mercer's functional . . . . .	111
3.2.1 Discrete Jensen-Mercer's functional . . . . .	111
3.2.2 Integral Jensen-Mercer's functional . . . . .	114
3.2.3 Discrete Jensen-Mercer's functional under the Steffensen's conditions . . . . .	117
3.2.4 Integral Jensen-Mercer's functional under the Steffensen's conditions . . . . .	120
3.3 Superadditivity of the Petrović-type functionals . . . . .	122
<b>4 Some further improvements. Levinson's functional</b>	<b>131</b>
4.1 Refinements of the inequalities related to Jessen's functional . . . . .	131
4.1.1 Application to weight generalized means . . . . .	134
4.1.2 Application to Hölder's inequality . . . . .	141
4.2 Superadditivity of Levinson's functional . . . . .	144
4.2.1 Applications . . . . .	151
<b>5 Different approaches to superadditivity</b>	<b>155</b>
5.1 On a general inequality with applications . . . . .	155
5.2 Properties of some functionals associated with $h$ -concave and quasilinear functions with applications to inequalities . . . . .	160
5.2.1 Functionals associated with monotone $h$ -concave and $h$ -convex functions . . . . .	160
5.2.2 Case 1: function $v$ is additive . . . . .	163
5.2.3 Case 2: function $v$ is superadditive . . . . .	166
5.3 Superadditivity of functionals related to Gauss' type inequalities . . . . .	171
5.3.1 Functionals related to Gauss-Pólya inequalities . . . . .	173
5.3.2 Functionals related to the Gauss-Winckler inequality . . . . .	175
<b>6 Jensen-type functionals for the operators on a Hilbert space</b>	<b>179</b>
6.1 Motivation . . . . .	180
6.2 Superadditivity of the Jensen functional for the operators on a Hilbert space . . . . .	181
6.3 Application to operator means . . . . .	184
6.4 Integral Jensen's functional for the operators on a Hilbert space . . . . .	187
6.5 Multidimensional Jensen's functional for the operators on a Hilbert space . . . . .	190
6.5.1 Multidimensional operator convexity and concavity . . . . .	191
6.5.2 Superadditivity of the multidimensional Jensen functional for the operators on a Hilbert space . . . . .	192

6.5.3	Connections . . . . .	194
6.5.4	Solidarities . . . . .	195
6.5.5	Multidimensional weight geometric means . . . . .	197
<b>7</b>	<b>Improvements of some matrix and operator inequalities via the Jensen functional</b>	<b>199</b>
7.1	Improved Heinz inequalities via the Jensen functional . . . . .	199
7.1.1	Improved Heinz norm inequalities via boundedness of the Jensen functional . . . . .	201
7.1.2	Operator analogues of the Heinz norm inequalities . . . . .	205
7.2	More accurate weak majorization relations for the Jensen and some related inequalities . . . . .	209
7.2.1	Improved weak majorization inequalities for the Jensen inequality . . . . .	211
7.2.2	Applications to log convex functions . . . . .	219
<b>8</b>	<b>The converse Jensen inequality: variants, improvements and generalizations</b>	<b>223</b>
8.1	Variants of the converse Jensen inequality . . . . .	224
8.2	Improvements and generalizations of the Lah-Ribarič inequality . . . . .	227
8.3	Improvements of the Giaccardi and the Petrović inequality . . . . .	244
8.3.1	Giaccardi-Petrović differences . . . . .	247
8.4	Refinements of the converse Hölder and Minkowski inequalities . . . . .	254
8.4.1	Application to mixed means . . . . .	262
<b>9</b>	<b>Further improvements and generalizations of the Jessen-Mercer inequality</b>	<b>265</b>
9.1	Improvements of the Jessen-Mercer inequality . . . . .	266
9.2	Generalization on convex hulls . . . . .	269
9.2.1	Jessen-Mercer differences . . . . .	276
<b>10</b>	<b>New improved forms of the Hermite-Hadamard-type inequalities</b>	<b>283</b>
10.1	More on the Hermite-Hadamard inequality . . . . .	283
10.2	Improvements . . . . .	285
10.3	Hammer-Bullen differences . . . . .	296
<b>11</b>	<b>On the refinements of the Jensen operator inequality</b>	<b>303</b>
11.1	Jensen's operator inequality . . . . .	303
11.2	Application to quasi-arithmetic and power means . . . . .	318
11.3	Converses of Jensen's operator inequality . . . . .	333
11.3.1	Difference type converse inequalities . . . . .	336
11.3.2	Ratio type converse inequalities . . . . .	342
11.3.3	A new generalization of the Kantorovich constant . . . . .	349
<b>Bibliography</b>		<b>351</b>
