

Contents

1.	Introduction	1
2.	Primitive Dimension Structure	2
3.	Rudiments of Dimension Theory	4
4.	Subspace and Sum Theorems	6
5.	More Fundamentals	8
6.	Covering Dimension, Other Approaches	9
7.	Cohomological Dimension	10
8.	Simplicial Complexes	12
9.	Polyhedra	16
10.	Subdivisions and CW-Structure	21
11.	Stratifiable Spaces	23
12.	Homotopy Extension	26
13.	Extension Dimension I	29
14.	Basics of Extension Theory	31
15.	The Ψ Operator	36
16.	Canonical Maps	38
17.	Extension Properties of dd -Spaces	44
18.	Subspace Theorems in Extension Theory	47
19.	Extension Theory Factorization Theorem	51
20.	Extension Properties of Paracompact, Stratifiable and Metrizable Spaces	59
21.	Sum Theorems in Extension Theory	66
22.	Engulfing Theorem	72
23.	Extension Properties of Pseudo-Compact Spaces	74
24.	Inverse Sequences and Semi-Sequences	79
25.	Homotopy of Maps of Semi-Sequences	84
26.	Contiguous Extension Lemma	86
27.	Preparation for Characterization Theorems	87
28.	Inverse Sequence Characterization Theorems	91
29.	First Inverse Sequence Limit Theorem	97
30.	Further Inverse Sequence Limit Theorems	102
31.	Semi-Sequence Limit Theorem	103
32.	Inverse System Limit Theorems	110

33.	Extension Dimension II	113
34.	Extension Dimension III	117
35.	Some Generalizations of Extension Dimension	121
36.	K-Homotopy and K-Invertibility	123
37.	Extension Shape or K -Shape	127
38.	Direct System Limit Theorems I	136
39.	Direct System Limit Theorems II	143
40.	Direct System Limit Theorems III	146
41.	Finite Products of $[0, \Omega)$	156
42.	Extensional Maps	165
	Bibliography	177
	Index	183
