Preface	v
1 Refinements of Jensen's and the Lah-Ribarič inequalities and applications to the Csiszár divergence	1
1.1 New refinements	3
1.1.1 The Hermite-Hadamard inequality	10
1.1.2 Hölder's inequality	12
1.1.3 Power and quasi arithmetic means	15
1.2 Applications in information theory	19
Bibliography	35
2 Jensen-McShane type inequalities on a rectangle and applications	37
2.1 Jensen-McShane type inequality on a rectangle	41
2.1.1 Main result	41
2.2 Applied results	44
2.2.1 Diaz-Metcalf type inequalities	45
2.2.2 Hadamard and Fejér type inequalities	47
2.2.3 Lupaş type inequalities	51
2.2.4 Petrović type inequalities	55
2.3 Advanced conversion	58
2.3.1 Main result	58
2.3.2 Gheorghiu type inequality	62
Bibliography	66
3 Class of $(h, g; m)$-convex functions and certain types of inequalities	67
3.1 A class of $(h, g; m)$ -convex functions	69
3.2 Hermite-Hadamard type inequalities for $(h, g; m)$ -convex functions	73
3.3 Fejér type inequalities for $(h, g; m)$ -convex functions	80
3.4 Lah-Ribarič type inequalities for $(h, g; m)$ -convex functions	85
3.4.1 Obtaining Hermite-Hadamard and Fejér inequalities	89
3.4.2 Inequalities of Giaccardi, Popoviciu and Petrović	90

3.4.3	Applications: Converses of the Jensen inequality	93
3.5	Jensen type inequalities for $(h, g; m)$ -convex functions	95
3.5.1	Schur type inequalities	96
3.5.2	Jensen type inequalities	98
3.6	Fractional inequalities of the Hermite-Hadamard type for $(h, g; m)$ -convex functions	100
3.6.1	Fractional Hermite-Hadamard inequalities	104
3.6.2	Applications: Bounds of fractional integral operators for $(h, g; m)$ -convex functions	111
	Bibliography	115
